### Inauguration of James W. Crawford III, the Sixth President of Felician University

Congratulations are in order for Felician University President James W. Crawford, III, who celebrated his historic [inauguration](#) to the post on April 29, 2022 after a week long celebration at the University. A former Navy officer and judge advocate general, President Crawford was named the sixth president of Felician University in June of 2021 and had been serving as Interim president since September 2020. President Crawford is the first Black president at Felician University and the first male to hold the position.

Chris Swenson, chair of the university's board of trustees, said of Crawford, "His hands-on experience in steering the university during one of the most challenging periods in its history enables him to step into the role of president fully prepared to take us to new heights."

Felician was the rare private university that saw an enrollment increase during the pandemic year, a time when other colleges have lost students.

### 2022 Undergraduate Research Symposium

Throughout the Fall and into the early weeks of the Spring semester, students eager to bring innovation to current issues engaged in research. To encourage independent research and continued engagement in STEM majors, ICUNJ offered select students up to \$1000 for resources, stipend and other associated expenses and an opportunity to participate in its annual [Undergraduate Research Symposium](#). The Symposium kicked off April 4th with past student participants sharing lessons learned as they continued through advanced degrees and onto employment. Our thanks go out to Olivia Blondheim, '18, Drew University; Flobater Fawargi, '21, Monmouth University; and Theresa M. Kucinaki, '16, Drew University for sharing their appreciation for the undergraduate experience and the value of mentorship, making career course adjustments and building strong communication skills. Twenty-one student projects were reviewed by virtual panels of industry professionals, research faculty and Board of Advisors members over the next three days. Research ranged from testing a new and facile route to build the aflatoxin core to exploring the production of a more water soluble form of melanin to food intake and body weight impact during time restricted feeding. These topics were covered by the top performers earning high marks in communication, use of presentation resources, and research ownership. Congratulations to top scorers Shanid Shrestha, '22, Caldwell University; Daniella Marrero, '22, Caldwell University; and George Afoakwah, '23, Rider University respectfully.

### Governor Murphy Welcomes the Saint Peter's Men's Basketball Team to Drumtacket

### Caldwell Partners with St. George's University School of Medicine and Essex County College

Caldwell University has entered a [partnership with St. George's University and Essex County College](#) to streamline admission for eligible students to St. George's University School of Medicine. Accepted students will complete two years at Essex County College and one year at Caldwell University before pursuing a four-year medical degree at St. George's.

Students in the 2+1+4 program must successfully complete their first two years of undergraduate study at Essex County College with an associate's degree in biology. Then they must complete one year of undergraduate study at Caldwell University. After that, they'll move on to the four-year medical degree program at St. George's University in Grenada. They'll also have the opportunity to spend their first year of medicine at Northumbria University in the United Kingdom, which maintains a special partnership with St. George's University. In order to remain eligible for the program, students must maintain a 3.4 grade point average while enrolled at Essex County College and at Caldwell. They must also register a competitive score on the MCAT.

Students accepted to the 2+1+4 program will receive a \$10,000 scholarship upon matriculating at St. George's University. They will receive their Bachelor of Science degree from Caldwell upon successfully completing the first year of the SGU's MD program.

### Bloomfield College Game Design Program Ranked Highest in New Jersey

For the fourth year in a row, The Princeton Review has named Bloomfield College a [top undergraduate school for Game Design](#). Bloomfield College is ranked highest in New Jersey and #37 nationally among undergraduate schools offering programs in game design.

Bloomfield College's Bachelor of Arts in Game Design within the Creative Arts & Technology Division is a practice-orientated program focused on core principles, concepts, methodologies and skills that are reinforced through the creation of hands-on projects. Many courses also involve students working on collaborative team-based projects that mimic real-world game development environments. Theoretical knowledge and practical methods converge within these environments to provide students with the experience they need to truly understand and overcome the complexities involved in making games.

"We enthusiastically recommend Bloomfield College to students considering a career in this burgeoning field," said Rob Franek, Editor-in-Chief for The Princeton Review. "Together with the other exceptional schools on our 2022 list, their facilities are state-of-the-art, and their alumni include many of the industry's most successful artists, designers, developers, and entrepreneurs."
